Guardian Strategy Validation Report*

Strategy Name: **Euro 1 v1.1**

Pro Generation Strategy Design

Currency Pair: EUR USD

Testing Period: 01-01-2022 to 09-05-2025

Overview

The EURO1 strategy for EURUSD on the M5/H1 timeframe has undergone extensive backtesting and analysis. Each strategy is subject to rigorous tests involving over 100 hours of computer-based evaluation to ensure its robustness and viability.

TOTAL PROFIT

Avg Consec Wins	3.75	Avg Consec Loss	1.24	Avg # of Bars in Wins	242.73	Avg # of Bars in Losses	342.31

Trading Analysis

Euro 1 v1.1 ProGen is a hybrid expert advisor designed for the EUR/USD pair using both M5 and H1 timeframes. It leverages multiple indicators including **Woodies CCI**, **ADX**, and **Keltner Channel logic** to identify trend-following entries. The strategy opens long or short trades when specific combinations of trend strength and breakout conditions align, with trade entries evaluated at the close of the bar to reduce noise. Exit conditions include a fixed take profit and stop loss, as well as a trailing stop that activates once the trade reaches a minimum profit threshold. This EA is built for short- to medium-term intraday trading, aiming to capture directional moves while adapting to market volatility through its dynamic trailing stop mechanism.
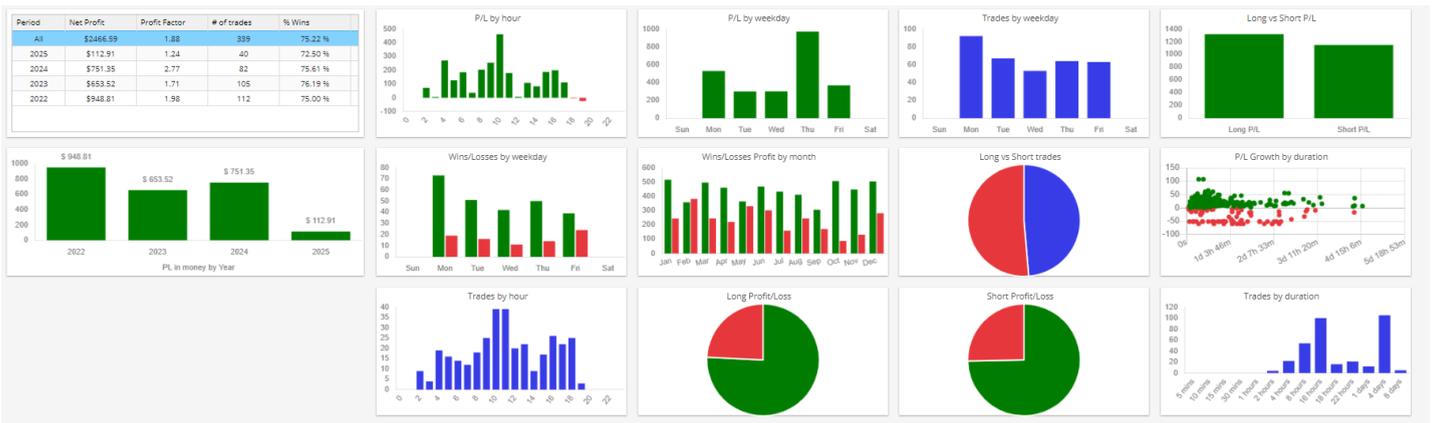

Equity Chart

The following chart demonstrates the equity growth over time, highlighting the strategy's performance during the backtesting period.

Comprehensive Trade Analysis

This section summarizes key performance metrics such as win rate, profit factor, and maximum drawdown, ensuring the strategy's effectiveness.

Period	Net Profit	Profit Factor	# of trades	% Wins
All	$2466.59	1.88	339	75.22 %
2025	$112.91	1.24	40	72.50 %
2024	$751.35	2.77	82	75.61 %
2023	$653.52	1.71	105	76.19 %
2022	$948.81	1.98	112	75.00 %

Monte Carlo Simulation

To ensure the robustness and reliability of this trading strategy, a Monte Carlo simulation was conducted. This method involves running numerous randomized simulations to account for variability in market conditions, trade sequences, and potential slippage. The simulation confirms consistent profitability across randomized scenarios, reinforcing the strategy's resilience.
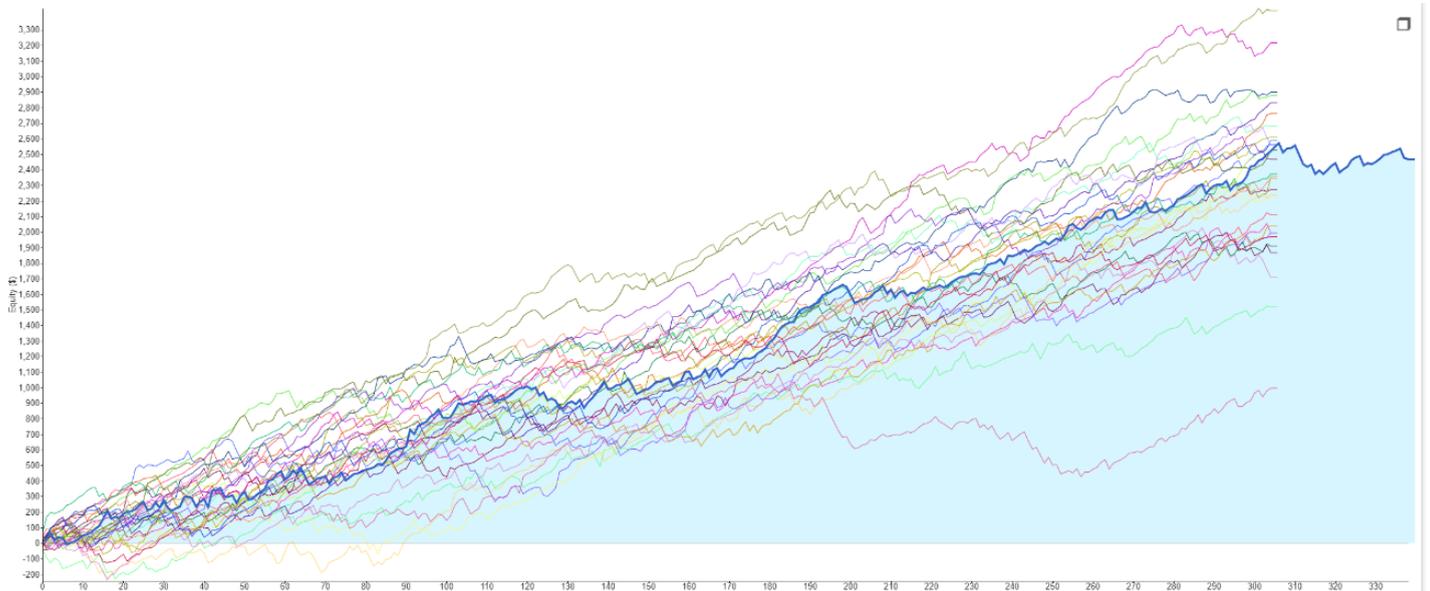

Metatrader 4 Backtest

To double check the authenticity of our original backtests, we also run it on a high quality tick data Metatrader 4 backtest to compare the results and confirm the strategy is viable. This is important as we are running the software on the Metatrader platforms in real life so we have to ensure it trades correctly on this platform. The results from both platforms have to be virtually identical for a strategy to pass.
